Wheel adopts 125 luxury silent wheel (equipped with central brake system)

Multiple models, complete range, welcome to consult!

Product Introduction

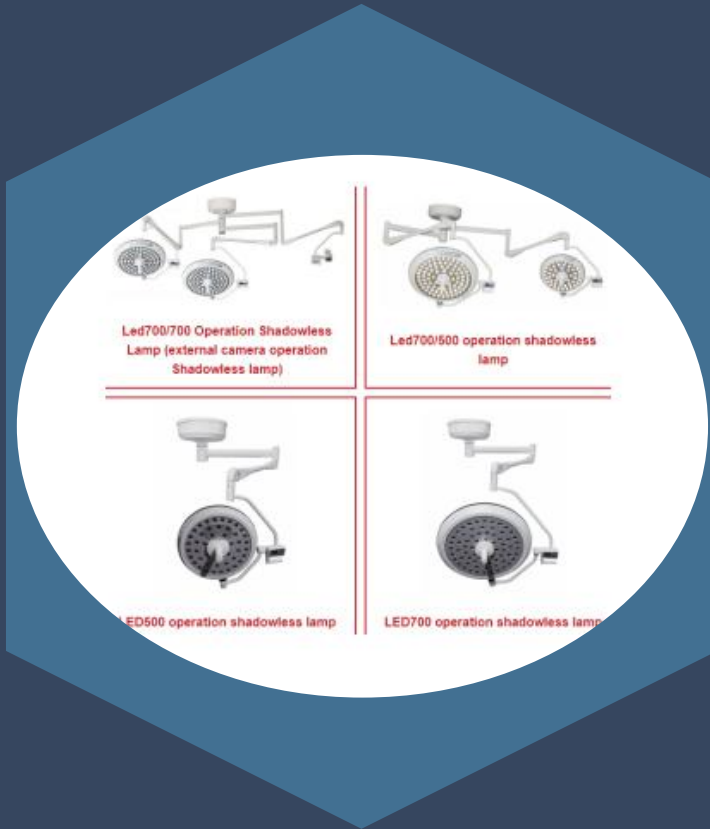

Full color rendering during anesthesia.

Different from the display of tissue, adjusting the color temperature of the operating lamp can make the bright tissue and necrotic tissue see more clearly, helping surgeons to improve the quality of surgery; Different people have different adaptability to light and sensory degree. The color temperature adjustable technology can adjust the color temperature to the most appropriate color temperature for surgery. Adjusting the color temperature during surgery can relieve the visual fatigue of doctors, which is a new light source for surgical lighting innovation. Super long service life lighting source, LED life can reach more than 60000 hours, no need to replace the bulb.

Imported LED cold light source without infrared radiation, nano coating radiator, creating our excellent heat dissipation effect. Light emitting diode as light source cold light source, no temperature rise, no ultraviolet radiation, no stroboscopic.

Under the same brightness, LED energy consumption meter is 1/10 of the ordinary incandescent lamp, halogen lamp 1/2. This lamp is impact resistant, waste recyclable and mercury free, and the light emitted does not contain infrared and ultraviolet components without radiation pollution. Perfect shadowless lamp effect, using scientific radian focusing design, subtly avoid the shield of the doctor's head and shoulder, to achieve perfect shadowless lamp effect and super depth lighting.
